Vilnius Gediminas Technical University	Reinforced Concrete Structures and Geotechnics	A new bond model for the serviceability analysis of reinforced concrete members	Prof. Dr Habil. Gintaris Kaklauskas	1	–	–	–	–	–
	Roads	Selection of methods of traffic flow estimation influence with roads' elements capacity	Prof. Dr Alfredas Laurinavičius	1	–	–	–	–	–
	Construction Technology and Management	Construction project and the building management system in WebBIM environment	Assoc. Prof. Dr Tatjana Vilutienė	1	–	–	–	–	–
	Building Energetics	User behaviour data integration into building information model	Assoc. Prof. Dr Violeta Motuzienė	1	–	–	–	–	–
	Roads	Road geometric parameters optimization in upgrade projects without changing road infrastructure land plot limits	Assoc. Prof. Dr Viktoras Vorobjovas	1	–	–	–	–	–
	Construction Management and Real Estate	Creation of information system prototype to optimise construction site plan, using virtual reality technology	Prof. Dr Habil. Leonas Ustinovičius	1	–	–	–	–	–
	Roads	Assessment of the expediency of the creation of industrial parks in Lithuania for revitalization of regions	Prof. Dr Marija Burinskienė	1	–	–	–	–	–
	Steel and Composite Structures	Structural behaviour of innovative structural system of steel string bridges	Prof. Dr Algirdas Juozapaitis	–	–	1	–	–	–
	Roads	The model of asphalt pavement layers thickness and density determination by nondestructive method	Prof. Dr Audrius Vaitkus	–	–	1	–	–	–
	Construction Management and Real Estate	Development of a method and intelligent decision support system for sustainable renovation of a built environment	Prof. Dr Habil. Artūras Kaklauskas	–	–	1	–	–	–
	Roads	Influence of rail defects on the operating life of the railway track-side	Prof. Dr Daiva Žilionienė	–	–	–	–	1	1
