

REFERENCE LIST

Please use the APA (surname and year) short reference system for citations in the text with a detailed alphabetical list at the end of the paper. For the work by two authors both should be mentioned every time. The word “and” between the authors’ names within the text and the ampersand in parentheses should be used, e.g. Brown and Caste (2004)... or (Brown & Caste, 2004). The first author’s surname followed by et al. should be used if the item have three or more authors (Singh et al., 2012). Write out the full name of the organizations or groups that serve as authors the first time they appear in the text, e.g. (Vilnius Gediminas Technical University [VILNIUS TECH], 2018). For subsequent citations, the name of the group or organization may be abbreviated (VILNIUS TECH, 2018). In case the list of references includes persons bearing the same surnames, the first letter of the author’s name should be indicated, e.g. (V. Paulauskas & D. Paulauskas, 2013). Sources of the same authors and the same year should be mentioned in the following way (Liu, 2013a, 2013b). In case no author is indicated, the title of the source in the signal phrase, and the first word or two of the title in the parentheses should be used (*Oxford Dictionary of English*, 2010). If there is no date in the source, the abbreviation “n.d.” (for “no date”) should be used. Two or more works by different authors who are cited within the same parentheses should be listed in alphabetical order by the first author’s surname and putting semicolons between them. Please use the transliterated (not translated) version of the names and sources in Cyrillic according to the USA Library of the Congress Romanization rules <https://www.loc.gov/catdir/cpsd/roman.html>.
