Forwarding: [Learn more](#) [Add a forwarding address](#)

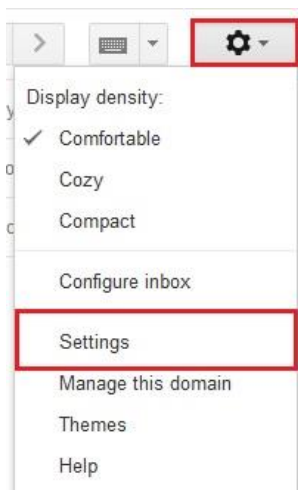

Tip: You can also forward only some of your mail by [creating a filter!](#)

POP Download: [Learn more](#)

1. Status: **POP is enabled** for all mail
 - Enable POP for **all mail** (even mail that's already been downloaded)
 - Enable POP for **mail that arrives from now on**
 - Disable POP**
2. When messages are accessed with POP
3. **Configure your email client** (e.g. Outlook, Eudora, Netscape Mail)
[Configuration instructions](#)

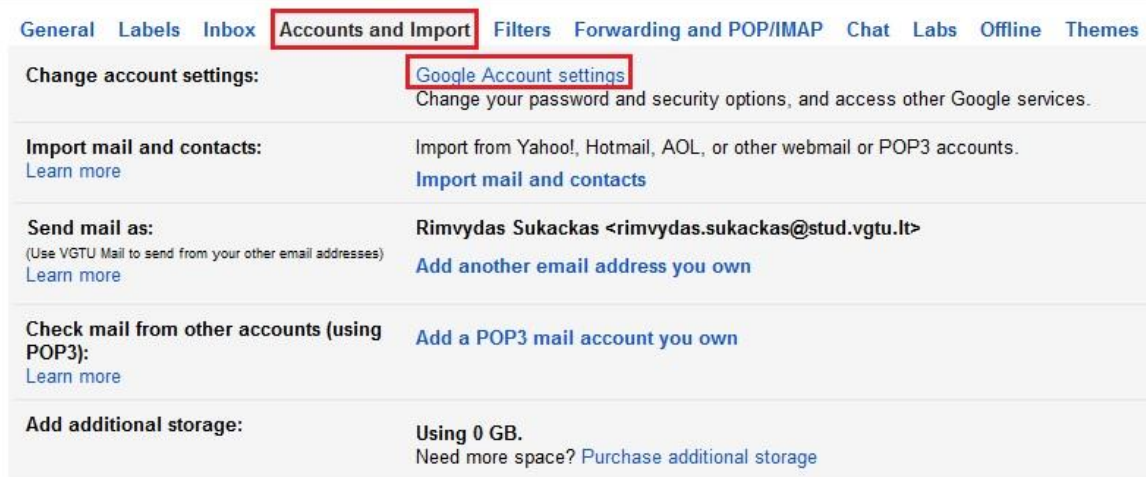

Taip pat reikės atlikti keletą paskyros saugumo nustatymo veiksmų:

3. Spaudžiame nustatymų mygtuką ir pasirenkame „Settings“.

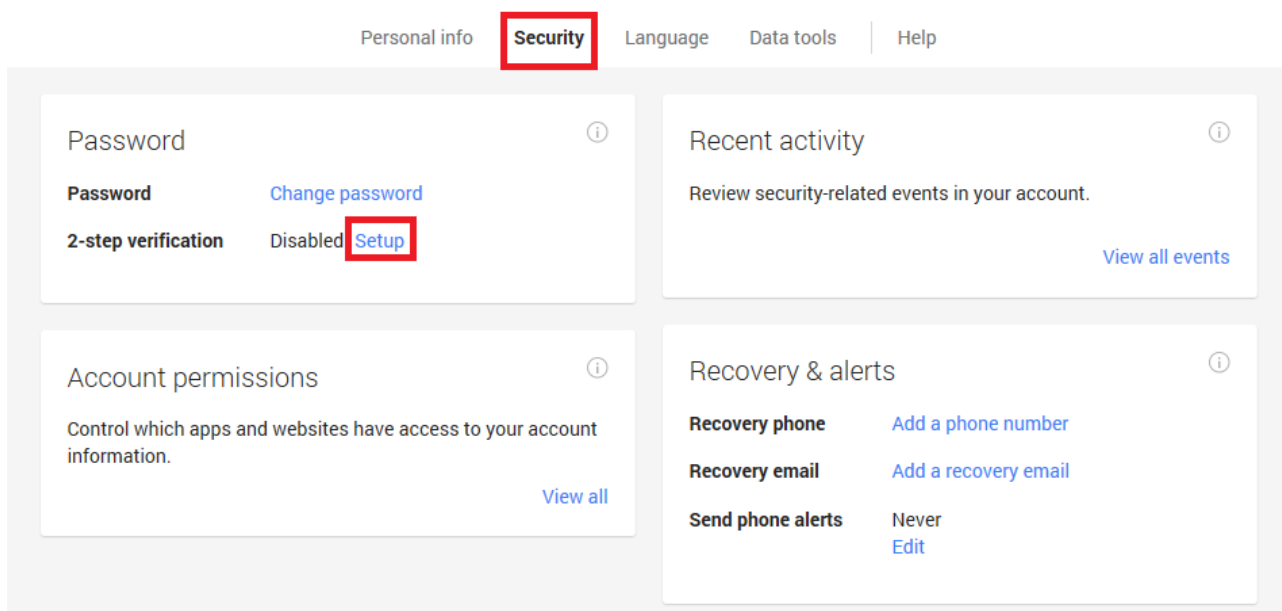

4. Spaudžiame „Accounts and Import“ ir pasirenkame „Google Account settings“.

Settings

A screenshot of the Gmail 'Settings' page. The 'Accounts and Import' tab is selected and highlighted with a red box. Below the tabs, there are several sections: 'Change account settings:' with a link to 'Google Account settings' (highlighted with a red box); 'Import mail and contacts:' with a link to 'Import mail and contacts'; 'Send mail as:' with a link to 'Add another email address you own'; 'Check mail from other accounts (using POP3):' with a link to 'Add a POP3 mail account you own'; and 'Add additional storage:' with a link to 'Purchase additional storage'.

5. Spaudžiame „Security“ ir įjungiamo patvirtinimą dviem veiksmis spausdami „Setup“.

A screenshot of the Gmail 'Security' page. The 'Security' tab is highlighted with a red box. Below the tabs, there are four main sections: 'Password' with a link to 'Change password'; '2-step verification' with a link to 'Setup' (highlighted with a red box); 'Recent activity' with a link to 'View all events'; and 'Recovery & alerts' with links to 'Add a phone number', 'Add a recovery email', and 'Edit'.

6. Spaudžiame „Start setup“.

Signing in with 2-step verification

Signing in will be different

You'll need verification codes:
After entering your password, you'll enter a code that you'll get via text, voice call, or our mobile app.

Keep it simple

Once per computer, or every time:
During sign in, you can tell us not to ask for a code again on that *particular computer*.

Help keep others out

You'll still be covered:
We'll ask for codes when you (or anyone else) tries to sign in to your account *from other computers*.

2-step verification

Keep the bad guys out of your account by using both your password *and* your phone.

[Start setup »](#)

[Learn more](#)

7. Įvedame mobiliojo telefono numerį, į kurį bus nusiųstas patvirtinimo kodas. Spaudžiame „Send code“.

Set up your phone

1

2

3

4

Which phone should we send codes to?

Google will send a numeric code to your phone whenever you sign in from an untrusted computer or device.

Phone number

ex: (8-612) 34567

- Google will only use this number for account security.
- Message and data rates may apply.

How should we send you codes?

Text message (SMS)

Voice Call

[« Back](#)

[Send code](#)

8. Suvedame 6 skaitmenų kodą, gautą į telefoną trumpąja žinute ir spaudžiame „Verify“.

Verify your phone

1 — 2 — 3 — 4

We sent a text message to **(8-600) 00000** with a code

Enter verification code

123456

Verification codes are 6 digits long.

« Back **Verify** Didn't get the code?

9. Spaudžiame „Next“.

Trust this computer?

1 — 2 — 3 — 4

Trusted computers only ask for verification codes once every 30 days.

If you lose your phone, you might be able to access your account from a trusted computer without needing a code. We recommend that you make this a trusted computer only if you trust the people who have access to it.

Trust this computer
You can always change which computers you trust in your Google Account settings.

« Back **Next »**

10. Spaudžiame „Confirm“.

Confirm

1 — 2 — 3 — 4

Turn on 2-step verification

You'll only be asked for a code whenever you sign in using your **vardenis@stud.vgtu.lt** account every 30 days, on each trusted computer or device.

If you lose your phone, you can always change it in account settings.

The Google Apps SLA (Service Level Agreement) does not apply to any services that are used in connection with 2-step verification, if the verification process relies on third-party voice or data providers to deliver the verification code. Details of the agreement are available [here](#).

« Back **Confirm**

11. Spaudžiame „App-specific passwords“.

2-Step Verification

Verification codes **App-specific passwords** Registered computers

PRIMARY WAY YOU RECEIVE CODES

Primary number
(8-600) 00000 [Edit](#)

Codes sent via: [Text message](#)
Added on: [Jan 27, 2014](#)

Get codes via our mobile app instead
Our app for Android, iPhone, or BlackBerry even works when your device has no data or phone connectivity. [Switch to app](#)

12. Spaudžiame „Manage application-specific passwords“.

2-Step Verification

Verification codes **App-specific passwords** Registered computers

CONFIGURING APPLICATIONS

App passwords allow 2-Step Verification users to access their Google Accounts through apps such as Mail on an iPhone or Mac, or Outlook.

Mail on iPhone or iPad

Microsoft Outlook

Mail on Mac

Unfortunately, such apps can only be configured with a username and a password, rather than a username, password, and verification code.

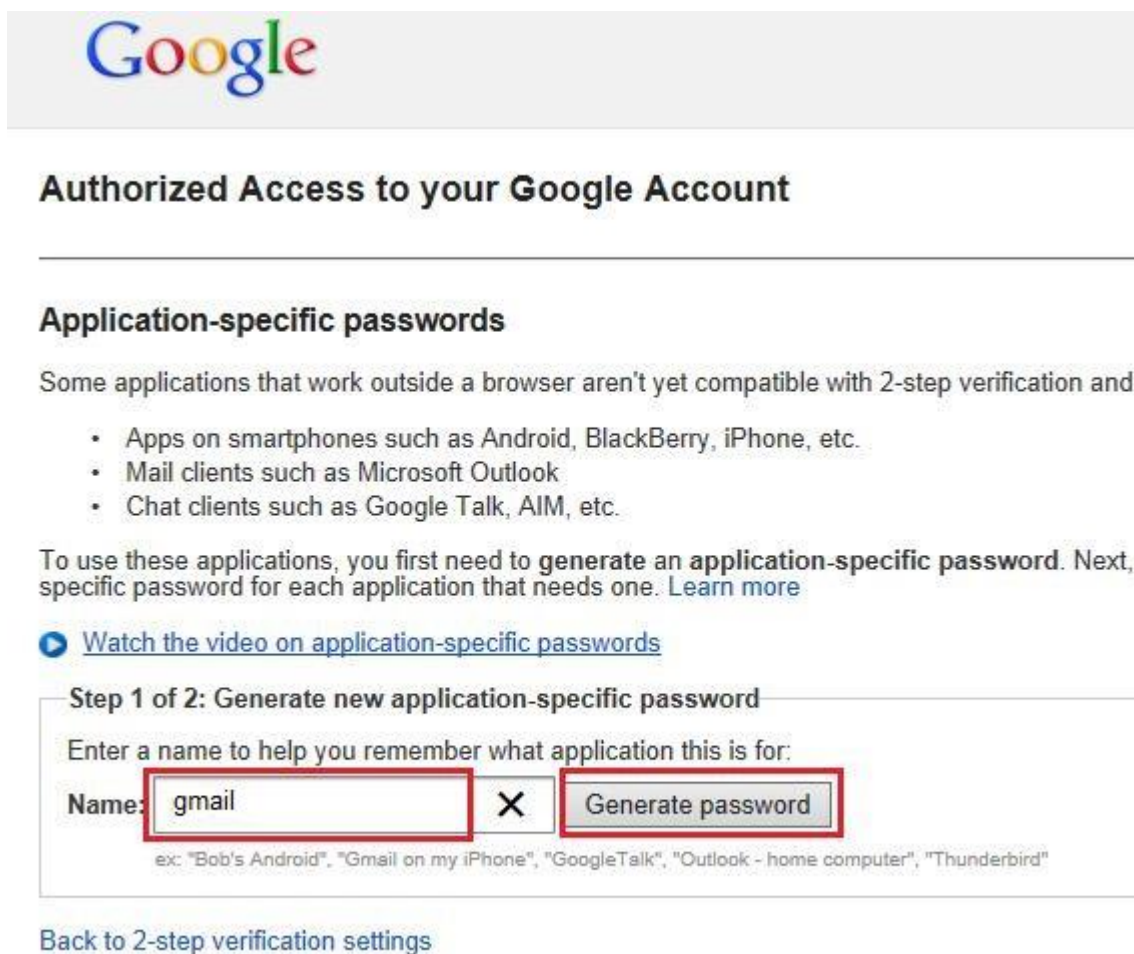

Instead of codes, you'll use app passwords to access your account through those apps.

If an app gives you an error about something being wrong with your password, you may need to configure it with an app password. Don't worry - we'll generate the app password for you, and you won't need to remember it. Or consider using a [Google app](#) instead.

[Manage application-specific passwords](#)

[Send feedback](#)

13. Įvedame norimą pavadinimą ir spaudžiame „Generate password“.

Google

Authorized Access to your Google Account

Application-specific passwords

Some applications that work outside a browser aren't yet compatible with 2-step verification and c

- Apps on smartphones such as Android, BlackBerry, iPhone, etc.
- Mail clients such as Microsoft Outlook
- Chat clients such as Google Talk, AIM, etc.

To use these applications, you first need to **generate** an **application-specific password**. Next, e specific password for each application that needs one. [Learn more](#)

▶ [Watch the video on application-specific passwords](#)

Step 1 of 2: Generate new application-specific password

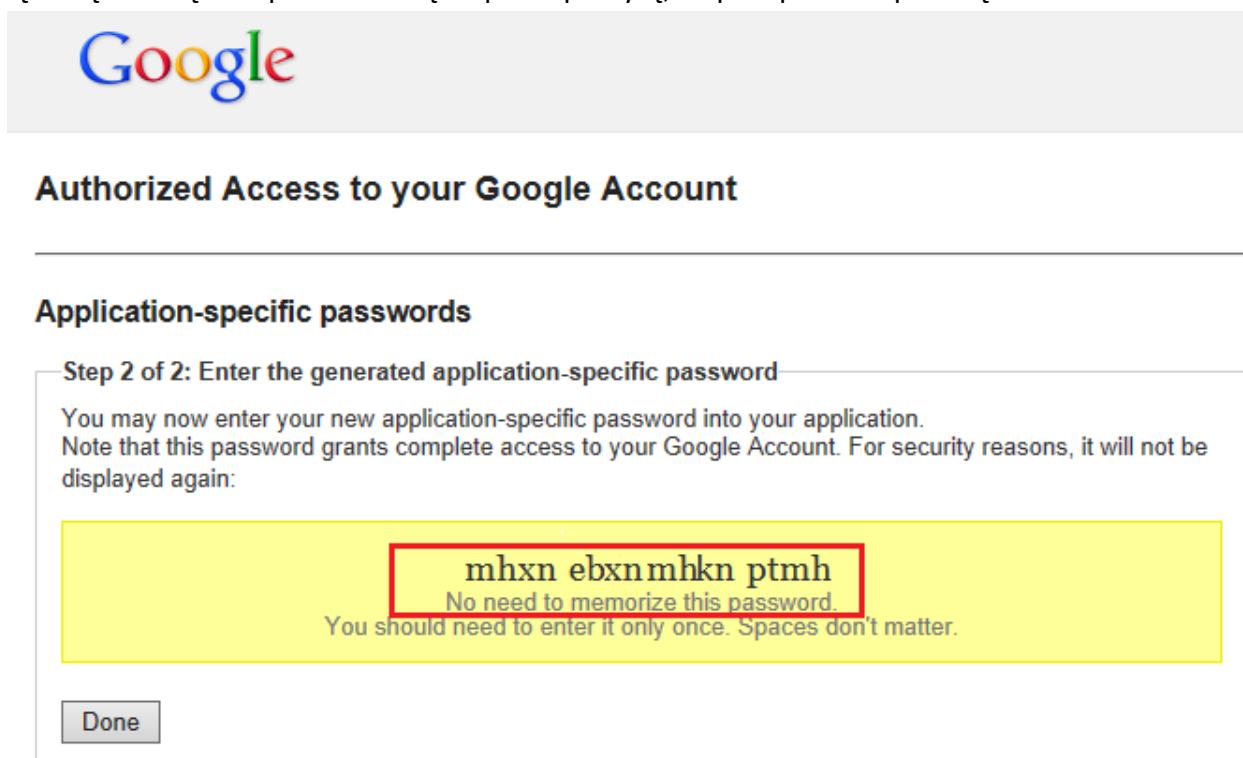

Enter a name to help you remember what application this is for:

Name:

ex: "Bob's Android", "Gmail on my iPhone", "GoogleTalk", "Outlook - home computer", "Thunderbird"

[Back to 2-step verification settings](#)

14. Šį kodą reikės įvesti pridėdant šią el. pašto paskyrą, kaip el. pašto slaptažodį.

Google

Authorized Access to your Google Account

Application-specific passwords

Step 2 of 2: Enter the generated application-specific password

You may now enter your new application-specific password into your application. Note that this password grants complete access to your Google Account. For security reasons, it will not be displayed again:

mhxn ebxnmhkn ptmh
No need to memorize this password.

You should need to enter it only once. Spaces don't matter.

15. Atidarę savo asmeninę paskyrą (@gmail.com galūne), pasirenkame „Accounts and Import“ ir „Add a POP3 mail account you own“.
