

Grading System and Recognition of Learning Outcomes

At VILNIUS TECH, study achievements are assessed using the 10-point grading system applied in Lithuanian higher education. The minimum passing grade is 5. Recognition of learning outcomes and credit transfer are carried out in accordance with the University's Description of the Procedure for Recognition of Learning Outcomes. Grades obtained at foreign higher education institutions are recognised with regard to the grading system used by the institution concerned and, where necessary, are converted using the provided grade equivalents.

Grade	Assessment	Short description
10	Excellent	Excellent, outstanding knowledge and abilities
9	Very good	Solid, good knowledge and abilities
8	Good	Above-average knowledge and abilities
7	Average	Average knowledge and abilities, with minor errors
6	Satisfactory	Below-average knowledge and abilities, with errors
5	Weak	Knowledge and abilities meet the minimum requirements
1–4	Unsatisfactory	Minimum requirements are not met

Indicative Correspondence to the ECTS Grading Scale

For the purposes of international mobility and recognition of learning outcomes, the Lithuanian 10-point grading system may be indicatively linked to ECTS grades:

Lithuanian grade Indicative ECTS equivalent

10	A
9	B
8	C
7	C/D
6	D
5	E
1–4	FX/F

Note. ECTS letter grades are provided for information purposes only. In the recognition process, the assessment is based on the learning outcomes achieved, the content of the course unit, the workload in credits, and the grading system applied by the partner institution.

When learning outcomes are being recognised, the partner institution's grading scale and grade distribution may also be taken into account to ensure fair recognition of academic achievements.

Recognition of Learning Outcomes

Learning outcomes obtained at Lithuanian or foreign higher education institutions are recognised in accordance with the VILNIUS TECH Procedure for Recognition of Learning Outcomes. Course units successfully completed during Erasmus+ study mobility and approved in the Learning Agreement are recognised and credited by the University.

If the partner institution applies a different grading system, its grading scale and, where necessary, grade distribution are taken into account during recognition. The student may be asked to provide information on the grading system used by the foreign institution if it is not indicated in the transcript of records or the Diploma Supplement.

ECTS Credit System

VILNIUS TECH applies the European Credit Transfer and Accumulation System (ECTS):

- 60 ECTS credits correspond to the workload of one academic year;
- 30 ECTS credits correspond to the workload of one semester;
- credits earned under the Erasmus+ programme are recognised and credited in accordance with the previously agreed study plan and the applicable procedure for recognition of learning outcomes.

Important:

If, after returning from studies abroad, an exchange student has completed course units amounting to fewer than 30 credits, the student will be given the opportunity to complete the missing course units free of charge within the next two semesters after resuming studies.

Exchange students retain the status of the study place they held before the mobility and take part in the rotation without partial study results being taken into account.
